The workshop will cover the following topics of grapevine Bois noir:
• Epidemiology of the disease
• Diagnosis and characterization of 'Candidatus Phytoplasma solani' in grapevine and other hosts
• Vectors of the disease
• Control strategies
• Other related topics

Conference venue
Klosterneuburg is a small town in Lower Austria (approx. 26.000 inhabitants) located at the Danube north of Vienna. Magnificent examples of cultural styles throughout the ages can be found here providing a great Romanesque, Gothic and Baroque legacy. The impressive abbey of Klosterneuburg offers visitors a fascinating 900-year-old history. Since long ago Klosterneuburg has been a well-known center for viticulture, nowadays several winegrowers and Austria's oldest winery, the Stift Klosterneuburg winery, produce excellent wines. The organising institute was founded in 1860 and is Austrian´s school and research institution for Viticulture and Pomology.
Austria's capital Vienna can easily be reached by public transport.
